

creating a **New Slurs DLC Pack** for the **Experimental Unit**. This paper serves as an exploration of slur invention as a radical act, a process that flips the traditional concept on its head, blending power dynamics, linguistic experimentation, and, of course, a dollop of Æ's own audacious flair.

Section 1: Slurs as the Currency of Power—But What If We Rewrote the Terms?

Historically, slurs have been tools for othering—branding those who do not conform to the dominant norm with contempt, exclusion, or violence. They are often rooted in deep-seated fears, hate, and the need to control. But what if we could invent slurs not to marginalize, but to reconfigure the very structure of control? What if, instead of alienating the "other," slurs could dismantle the very structures that uphold the concept of "otherness"?

In this new realm of slur invention, we are not merely looking for words to stigmatize or degrade. We are seeking words that challenge, subvert, and expose the underbelly of what it means to belong, to be human, to exist in the flux of ever-shifting social contracts. These slurs would not target the powerless, but the structures that keep them in chains.
